DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a method of match users in a straight comparison of like statistics, classified in class 705, subclass 001
 - II. Claims 6-12 are drawn to a method of tracking participants responses to other users and comparisons based on statistics versus user profile and site history, classified in class 705, subclass 1The inventions are distinct, each from the other because of the following reasons:
 2. Group I is a method of matching a participants responses to questions against the responses of a different participant to identify any similarities.
 3. Group II is a method of tracking participant responses to other participants with weighed values assigned to those responses. The sum of the weighted values are then used to determine a comparison of these values to that of a profile of an additional participant and make recommendations of compatible matches.
 4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
 5. A telephone call was made to Jeffrey Hall on November 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
